INTRODUCTION

GENERAL

This document provides all the information needed to install, evaluate and deploy this KWizCom product:

- Product Overview
- Installation Guide
- Administration Guide

PRODUCT OVERVIEW

List Aggregator app is part of [KWizCom Data View Toolset for SharePoint Online](#)

The KWizCom Aggregator App is a SharePoint client-side web part, utilizing the new SharePoint Framework (SPFx), that aggregates data items and documents from multiple sources: SharePoint lists/libraries, Excel files and MS Graph API.

The retrieved items are displayed using super-flexible, “Lego-style” controls, enabling you to have the exact view you need, including custom menus and actions and configurable filters.

As you can see, this display includes the following controls:

- Menu bar
includes actions that work on multiple-selected items
- Paging
- Table
displays a grid layout

All these are just default settings.

You can fully customize the display by configuring these controls and other controls, which are available with the Aggregator web part.

To learn how to use the template designer to configure each of the available controls, please review the [Data View Plus user guide](#).
