INTRODUCTION

GENERAL

This document provides all the information needed to install, evaluate and deploy this KWizCom product:

- Product Overview
- Installation Guide
- Administration Guide

PRODUCT OVERVIEW

List View Plus app is part of [KWizCom Data View Toolset for SharePoint Online](#)

KWizCom's List View Plus is a SharePoint client-side web part, utilizing the new SharePoint Framework (SPFx), that enables users to work with lists and libraries that are in other SharePoint sites, allowing them to use these lists as if they were local.

The retrieved items are displayed using super-flexible, “Lego-style” controls, enabling you to have the exact view you need, including custom menus and actions and configurable filters.

KEY FEATURES

Feature	List View Plus App	
	STD.	PRO.

INSTALLATION PROCEDURE

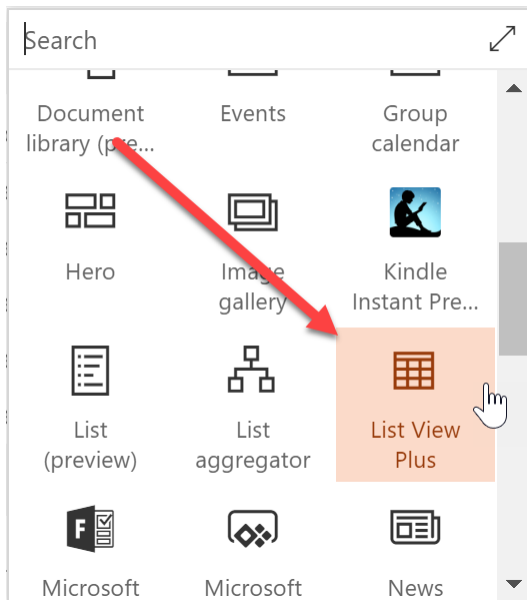

Please refer to installation instruction on KWizCom's website:

<http://www.kwizcom.com/sharepoint-apps/remote-list-viewer/download/>

ADMINISTRATION GUIDE

ADDING THE LIST VIEW PLUS WEB PART TO YOUR PAGE

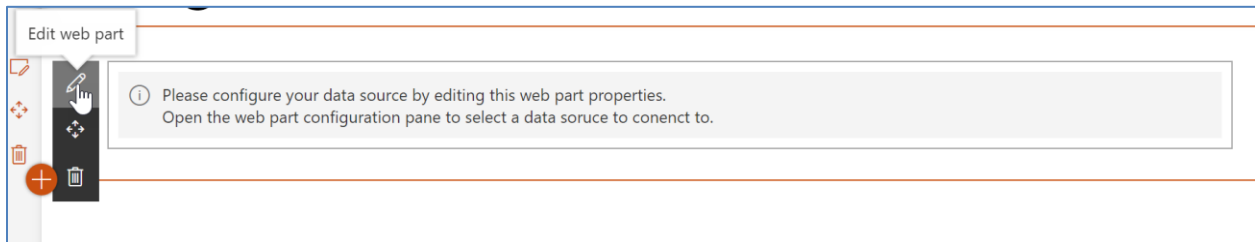

List View Plus app is part of KWizCom Data View Tools. After you install the package according to installation instructions, you will see the following web parts in the gallery:

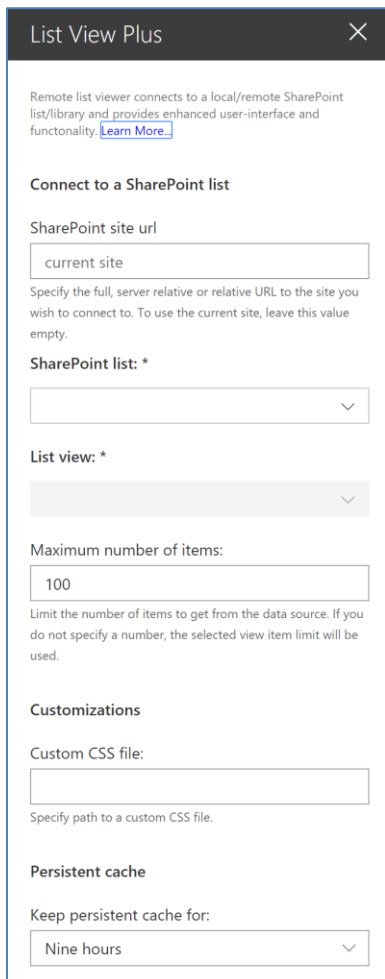

Click to add the List View Plus web part to your page.

LIST VIEW PLUS WEB PART DATA SOURCE CONFIGURATION

To configure the web, edit the web part settings:

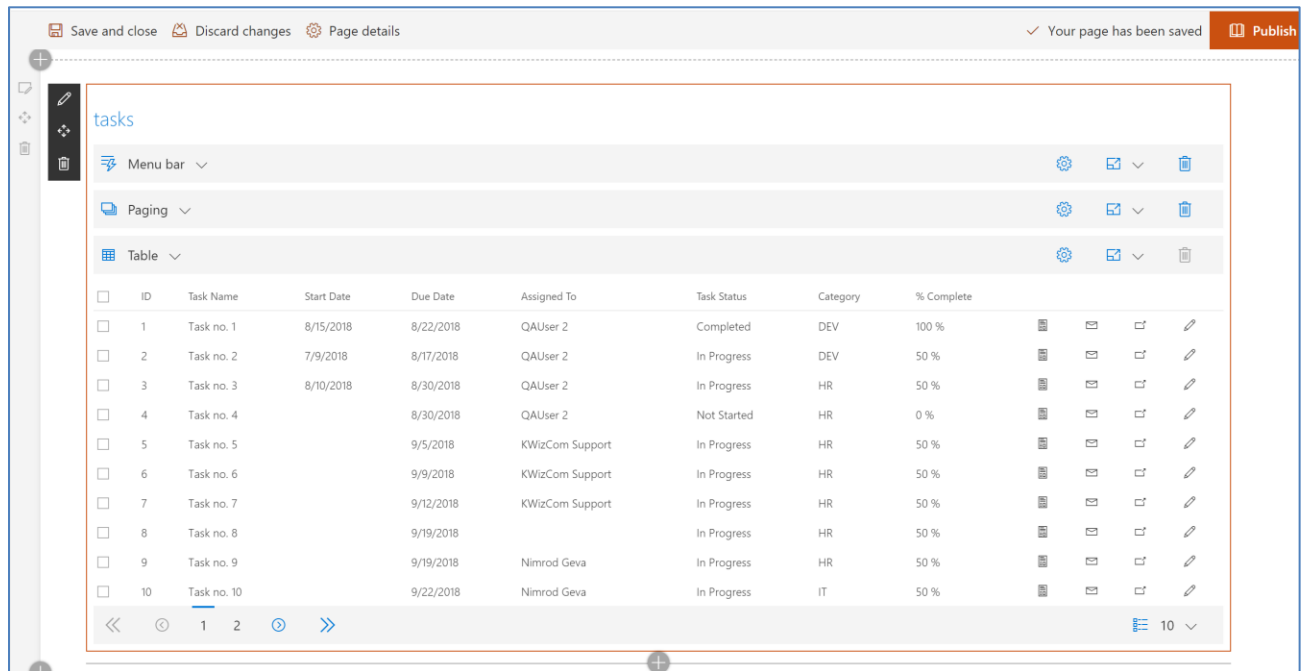

You will see the web part's toolpane:

Property	Description
SharePoint site url	Site where the list/library that you wish to display is located.
SharePoint list	Select the list/library that you want to display.
List view	Select the view that you want to display.
Maximum number of items	This property allows you to limit the number of items returned from the data source.
Custom CSS file	You can override various styles by providing your own CSS file url.
Keep persistent cache for	The web part caches requests that take longer than others to enhance the web part performance.

LIST VIEW PLUS WEB PART DISPLAY CONFIGURATION

After you connect the web part to a list you will see the following default display:

As you can see, this display includes the following controls:

- Menu bar
includes actions that work on multiple-selected items
- Paging
- Table
displays a grid layout

All these are just default settings.

You can fully customize the display by configuring these controls and other controls, which are available with the list view plus web part.

To learn how to use the control designer to configure each of the available controls, please review the [Data View Plus user guide](#).
